

Yousef Zakaria El-Tohamy

AI-Native Software Developer | Idea to Production with AI · Node.js · Next.js · Flutter

[\(+20\) 106 689 3596](tel:+201066893596) | youssefelftohamy.work@gmail.com | linkedin.com/in/yousef-eltohamy | West El-Golf, New Cairo, Egypt

PROFILE

Developer who takes software from idea to production with AI as an integral part of the process, not an occasional assistant. At IT Plus, builds rplya end-to-end — backend, web client, and mobile client — with Claude Code running through analysis, implementation, review, and refactoring across the whole cycle, and with Claude itself integrated into the product to generate Arabic conversational auto-replies for live customer conversations. Full-stack foundation in Node.js, NestJS, PostgreSQL, Next.js, and Flutter, so features get designed, built, shipped, and operated rather than prototyped and handed off. Certified in systematic AI-assisted development. Bachelor of Engineering in Computer and Systems, Zagazig University, 2025.

EXPERIENCE

Software Developer | IT Plus

Egypt | May 2026 – Present

- Integrate Claude into rplya to generate Arabic conversational auto-replies inside a live multi-channel messaging product — prompt design, response quality, and the constraints of Arabic-first conversation.
- Use Claude Code as a core part of the daily engineering cycle — analysis, implementation, review, and refactoring — which is how features move from idea to production quickly without giving up code quality.
- Design and build the RESTful APIs and backend services those AI features run on, with Node.js, NestJS, and Prisma over PostgreSQL, plus Redis for caching and BullMQ for queues and background jobs.
- Build the product's Next.js web client and Flutter mobile client, so AI features reach the user rather than stopping at the API.
- Integrate external services into the product: the WhatsApp, Instagram, Messenger, and Telegram channel APIs, and Paymob for payments, alongside a built-in mini-CRM with invoicing and shareable payment links.
- Troubleshoot, debug, and optimise the running system across the API, database, and client layers, and collaborate with the team on code reviews.

Coordinator | iSchool

Fully Remote | Jul 2025 – Jul 2026

- Coordinated a distributed team of instructors across multiple tracks, raising delivery quality through weekly reviews and structured feedback.
- Streamlined operations, schedules, and performance evaluations, and onboarded new team members into remote workflows.

Coding Instructor | iSchool — DEMI Program

Remote & Onsite | Jun 2024 – Jul 2025

- Taught programming fundamentals and AI basics to 1000+ students aged 10–12 across multiple intakes, and mentored students one-on-one through hands-on exercises and project feedback.

AI PROJECTS & PRODUCT WORK

rplya — Arabic-First Multi-Channel SaaS with Conversational AI | IT Plus product

- Build the product end-to-end — a unified inbox bringing WhatsApp, Instagram, Messenger, and Telegram into a single conversation view for small and medium businesses.
- Claude-powered Arabic auto-replies running against real customer conversations, on a NestJS and Prisma backend over PostgreSQL with Redis and BullMQ for caching, queues, and background jobs.
- Built-in mini-CRM with invoicing and shareable payment links, plus Paymob payment integration; clients in Next.js and Flutter.

MedEase — AI-Powered Healthcare Platform | Graduation Project

- Built a multi-role platform connecting patients, doctors, and admins, with an integrated AI symptom checker served over REST APIs; graded Excellent.
- Delivered a bilingual Arabic/English interface with full RTL support on a clean, scalable architecture.

CERTIFICATIONS

Code with AI — Omar Ahmed (2026)

Systematic use of Claude in software engineering: prompt design, agent memory, integrated workflows, and structured AI-assisted development.

SKILLS

AI & LLM Engineering

Claude / Anthropic API · LLM Integration · Prompt Design · Agent Memory · Conversational AI (Arabic) · Claude Code · AI-Assisted Development

Backend, APIs & Databases

Node.js · NestJS · Express · Prisma · REST API Design · PostgreSQL · Redis · BullMQ · Clean Architecture · OOP

Frontend & Mobile

Next.js · React · Tailwind CSS · Flutter · Dart · Localization (i18n & RTL)

Tools, Workflow & Collaboration

Git · GitHub · Code Reviews · Debugging · Performance Optimisation · Remote Collaboration · Mentoring · Problem Solving

EDUCATION

Bachelor of Engineering, Computer and Systems | Zagazig University, Faculty of Engineering

Zagazig, Egypt | Oct 2020 – Jun 2025

Graduation Project: Excellent — MedEase, an AI-powered multi-role healthcare platform.

VOLUNTEERING & LEADERSHIP

HR Manager | ZigZag Club, Zagazig University

Zagazig, Egypt | Dec 2023 – Jul 2024

- Managed recruitment and onboarding for a 500+ member student community, and delivered soft-skills sessions that improved engagement and role clarity.

Technical HR Head | ZigZag Club, Zagazig University

Zagazig, Egypt | Jul 2023 – Dec 2023

- Digitized the club's HR processes with Google Forms and Sheets, and created competency-based role criteria that made volunteer selection more consistent.
- Earlier: Brand Ambassador, IEEE Zagazig Student Branch (May 2023 – Jul 2023).

LANGUAGES

Arabic — Native English — Working Proficiency (spoken and written)
